

## **Braccio da Montone other Clarification**

I wanted to clarify two things that seem to have created confusion

1) *Battaglie* who follow the Rule of *Scuola Braccacca* can remove the disorder only in the rally point (5.4.3, 14.0.1 and 14.4.2)

2) In the battle of Sant'Egidio, historical scenario, Malatesta can activate an inactive *Battaglia* every time he has a basic activation (S2.6)

The rule says: All of Malatesta's *Battaglie* start the game Inactive. They are activated by a Basic activation, if an enemy unit comes adjacent to one of the *Battaglia*'s units, or by Heat Table.

You may read: All of Malatesta's *Battaglie* start the game Inactive. They are activated 1) by a Basic activation, 2) if an enemy unit comes adjacent to one of the *Battaglia*'s units, or 3) by Heat Table.
