Terrorists have bombed a highly sensitive private research facility owned by Lasalle Bionational Corporation in Lima, Peru. What we know of them is that they fanatically worship an alien-like god. Reports are inconclusive, they have stolen, or been infected by, a highly virulent bioweapon. So, they must be caught immediately. Bionational is paralysed. We, Earth Government, must respond with surgically precise force against these Terrorists before they go underground. Put down the Terrorists and confiscate their materials.

Mission A002: Trip to A&E

Time since Lima-Event: +29 hours
 Earth Population: ~13 Billion

Local authorities have been called to the New Hospital Nacional Arzobispo Loayza (NHNAL) in Lima, Peru, where a suspected-terrorist has died of an unknown rapid-onset parasitic disease, thought to be the Bioweapon from Bionational's Lima Facility. We now know these terrorists are some kind of cult, who wilfully seek to be incubators for the bioweapon. Your squad is ordered to terminate any trace of the Bioweapon at NHNAL. Be careful, intel informs us that Private Corporation Bionational is trying to cover this up with impunity. Act fast, this situation can still be contained.

Objective [Required]: Search and destroy the Incubator cell in New Chicago before their birthing becomes a full infestation. Resolve Special Node G.

Objective [W-Y]: Locate the infested Bionational Exec who broke lockdown, called Ostrow. Resolve node with Wayland-Yutani symbol attached.

SETUP Shadows: Include 2x Civilian, 3x Merely Shadows, and 1x Face-Hugger in the Shadows Deck.

Wayland-Yutani

Mission A003: Incubators Spread

Time since Lima-Event: +3 Weeks
Earth Population: ~13.1 Billion

These fanatics, infested by the bioweapon, went off grid in the first 24 hrs. Bodies with their chests ripped open were cropping up in different cities, countries, and even continents. Bionational has admitted that this bio-weapon, termed XX121, is an alien form of life, and advises considerable effort be made to control its spread. It is possible that each new born alien could become a fresh breeder, multiplying our concerns. Lethal force must be applied and all incubators be sought out and terminated on sight. We must get boots on the ground, this situation can still be controlled.

Objective [Required]: Search and destroy the Young Queen in its nest at Beverly Hills, California. Resolve node with USCMC symbol attached and kill the Young Queen enemy unit.

Objective [W-Y]: Acquire data on the rare occurrence of 'Egg-Transformation'. Resolve node with Wayland-Yutani symbol.

SETUP Shadows: Include 1x Civilian, 1x Chest-Burster, 4x Merely Shadows, 1x Runner, and 1x Ovomorph in the Shadows Deck.

 **USCMC**  **Wayland-Yutani**

CULT: If triggered then resolve Combat encounter against 2x Terrorists units.

Q: Combat encounter, 1x Young Queen and other Xenomorph XX121 enemies, generate RN for ADAPT. Young Queen is always face-up in the shadow Setup, therefore shuffle and deal 5 other cards face-down from the remaining Shadows deck.

Mission A004: The First Nests

Time since Lima-Event: +1.5 Months
 Earth Population: ~13.1 Billion

Some Incubator cells were left hindered. Now concentrations of the XX121 are festering in a handful of cities globally. Each Nest is laden with ~100 alien eggs and a self-impregnating Queen. Guarded by simple-minded yet violent adults that are acting like drones, kidnapping civilians for their breeding cycle and as food source. They do this without any attempt to be covert. Military forces are on standby for a mass of Missing Person reports so to respond in under 3 hours. Now, your squad must respond to missing persons in Beverly Hills. This situation can still be controlled if we are thorough in clearing infestation.

Objective [Required]: Storm the Bionational San Antonio Facility and uncover the truth. Find the Xenomorph specimens, autopsy of Incubator-0, and the Alien Artefact recovered from Colony LV-426 in the Research Hanger. Resolve nodes with **USCMC** symbol.

Objective [W-Y]: Steal bioweapon specimens. You must have a 'W-Y Specimen Capture' Specialist Unit in your squad and it survive for the entire mission.

Six Nests have been cleansed, and Bionational Corp remains secretive. Some 100k people globally are thought to have died. Bionational just lost permission to have private interests in the future use of 'XX121'. Present concerns are greater than who will be granted as sole copyright owner to a potential weapon system, the fate of humanity ominously looms. You are to storm Bionational Research Facility in San Antonio where intel claims Bionational moved all their research on the alien to after the Lima facility breach. Mission A006: Neo-Tokyo or Bust

Time since Lima-Event: +4 Months
Earth Population: ~12.8 Billion

Bionational's San Antonio facility revealed that as far as our generals are concerned Xenomorph XX121 is like a cockroach meets satan. Nests are cropping up globally now. New Chicago, Lesser Miami, East Moscow, Old Sydney, and so on. The Xenomorph predictably makes home close to its 'food source', their behaviour is instinctive. Cities are like a cattle pen to XX121. So, cities are being heavily monitored. Track and Trace of citizens is more far reaching than it has ever been. Such monitoring has drawn attention to missing persons near Neo-Tokyo. Now, a Fusion Power plant has gone silent. It is clear a Nest has been setup at the plant. Our TAG-teams are becoming experienced now, so Japanese Government has called for aid from us. Clear the nest out. We are the apex predator on earth, we will prevail.

Objective [Required]: Search and destroy two Mature Queens nomadically spreading the micro-Nests across the US Corn-Belt. Resolve Special Objective E twice.

Objective [W-Y]: Acquire AgriSolutions Inc latest high yield Corn research. Resolve wayland-Yutani symbol node.

Mission A008: Beijing's Draught

Time since Lima-Event: +9 Months
 Earth Population: ~9.6 Billion

The nuclear destruction of Jakarta was ordered recently. A necessity for the greater safety of all earthlings, or so it is being stylized. The hunt for micro-nesting and their complete cleansing is ongoing world wide. But, whilst that is happening there are scattered reports of XX121 going on the offensive. Mainland China is suffering under what seems a coordinated offensive targetting water treatment facilities. Limited fresh water resources dog the populace. XX121 is blocking sewers and overflowing streets with waste. Mega-city Beijing is on the verge of anarchy. Defend the water treatment plant in Qinghe.

Objective [Required]: Support martial law in Paris by patrolling the city. Resolve ALL nodes.

Mission A009: Coup D'etat France

Time since Lima-Event: +10 Months
Earth Population: ~8.4 Billion

A global coup d'etat toppled all civilian governments, seized power, and installed martial law. United Earth Military was officially formed to centralise all power to wage war on the Xenomorph threat. Suddenly the situation feels very different. No longer are we to search and destroy. Now we are to draw lines of defense and occupy key infrastructure. Launching TAG-teams has been replaced with manoeuvring Army Groups. The phrase 'spray & pray' has been replaced with 'conserve your ammo'. Checkpoints are everywhere to round up people to Testing Centres. Carriers are executed. If we form a united front then we can win this war.

Objective [Required]: Find and kill the Mature Queen below Paris. Resolve **Special Objective G**.

Objective [W-Y]: Deploy for experimental testing a new Anti-Xeno chemical weapon. Ignore risks to Parisian residential zones above. Spend 1 Intel Resource at each of the three nodes with **Wayland-Yutani symbol** after being resolved.

Mission A010: As Above So Below

Time since Lima-Event: +11 Months
Earth Population: ~7.8 Billion

United Earth Military's first offensive operation was the global effort to secure mega-cities. Mega-cities contained 70% of humanity and each time one would fall to XX121 the enemy ranks would swell enormously. So, to prevent XX121 recruitment their source of hosts must be denied to them. Hence effort to lockdown mega-cities. Your squad uncovered signs that XX121 were hiding a Hive below Paris. If the hive isn't extinguished then it would later ambush the city from below. So, your Battalion is ordered to storm the catacombs. We can still turn the tide in this war if we break the Xenomorph tide at Mega-city walls.

Objective [Required]: Plant Demolition charges and collapse the Boyancy Producing System of the Floating Airport, thereby quarantining Australia. Spend 1 DEMO Resource at each node marked by USCMC symbol, AFTER first resolving the node.
Objective [W-Y]: Escort a VIP Australian Exec to his private aircraft for escape. Resolve node with Wayland-Yutani symbol.

Mission A011: Australia Quarantined

Time since Lima-Event: +12 Months
 Earth Population: ~6 Billion

United Military was defeated in Australia. 14 Divisions were erased by a massive ambush leading to encirclement, launched from subterranean tunnels. The decision to quarantine Australia did not come as a shock. United Military shot down any craft civilian leaving Australia because we simply don't have the resources to inspect all escapees. Your orders are to sink New Sydney's biggest airport, floating on Homebush Bay, using demolition charges to collapse its boyancy system. This is part of a coordinated effort around Australia to cripple transportation. Top Brass says its for the greater good, but its getting hard to see that.

Mainland China went the same way as Australia, and the Eastern European war effort is hanging by a thread. United Military has satellite footage of the first above-ground structure seen built by the Xenomorphs. Built above a known mega-hive across California. Top Brass takes this as a sign that it houses the most sophisticated developments of the Xenomorph's on earth. Nukes were dropped but didn't penetrate to the Hive below. So, brass is mounting the last offensive operation, to turn the tide of the war and save humanity. Drawing on every army that can be spared to assault the Californian mega-hive. God help us.

Mission A014: Roll Credits

Time since Lima-Event: 18 Months
Earth Population: ~0.5 Billion

I confronted a commander prepping to leave and what I learnt popped the boil of despair that has been growing upon me for the last 6 months. Top Brass don't want to stop XX121 anymore. They want to "start over", wipe earth from orbit and terraform something new and beautiful. "The aliens have won, Corporal" the General concluded. "If it wasn't XX121 that ended it something else would have." He spewed atrocious nihilism to justify the borderline extinction of our people. "The alien attack isn't evil, it's an opportunity" the General said. I couldn't stand it. So, the show's over... Hold the Starport as long as possible so Top Bass can retreat to orbit.
