

THE FULDA GAP: The Battle for the Center

Counter Correction - May 16, 2020

The following are counter corrections for Fulda Gap.

- 1) LDR/154/15 is missing from the game and both front and back will need to be made.
- 2) 2, 3, 4/Pio have the wrong ATGM type on their fronts. These labels replace the fronts of those counters.
- 3) A, B, C, D/23 and A, B, C, D/12 are missing their Engineer symbol on their fronts. These replace those fronts.
- 4) The leaders from the 45GTR had the wrong values on their counters. These replace the fronts and backs of those counters.
- 5) The REC companies of the Soviet divisions incorrectly had an ATGM rating on them. These replace those counters and have deleted the ATGM symbol.
